Activity Signal
(User Manager point of view)

The case where Pseudo == Main User pseudo is handled at Network/Agent level

Agent

UserManager

Alt

Process Activity
(ID/Pseudo/Date)

Pseudo is associated to another active user but the
signaling user chose it before

Remove former user from actives

Process Inactivity(former user)

Add signaling to actives or reset it's timer if it is already active

Process new Active(new User)

Alt Pseudo isn't associated to any active user or is already
associated to the signaling user

Add signaling to actives or reset it's timer if it is already active

Process new Active(new User)
